

Installing the WhatsApp Application from the Microsoft Store

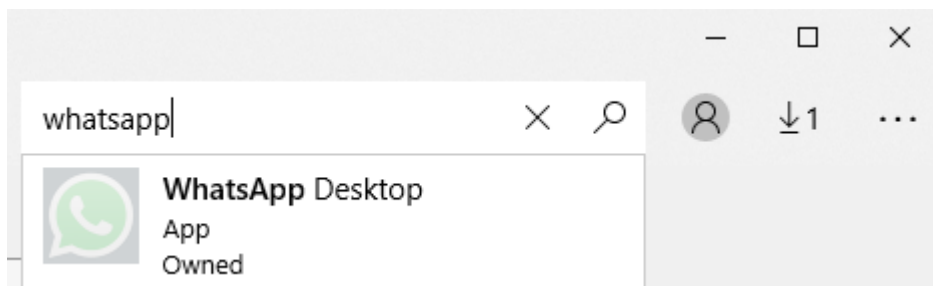

On your windows desktop click start and then click the Microsoft Store Icon. If you can not see the icon type **Microsoft Store** in the **Type here to search** box in the bottom left-hand corner. Then click the Microsoft Store icon in the search results under Best Match

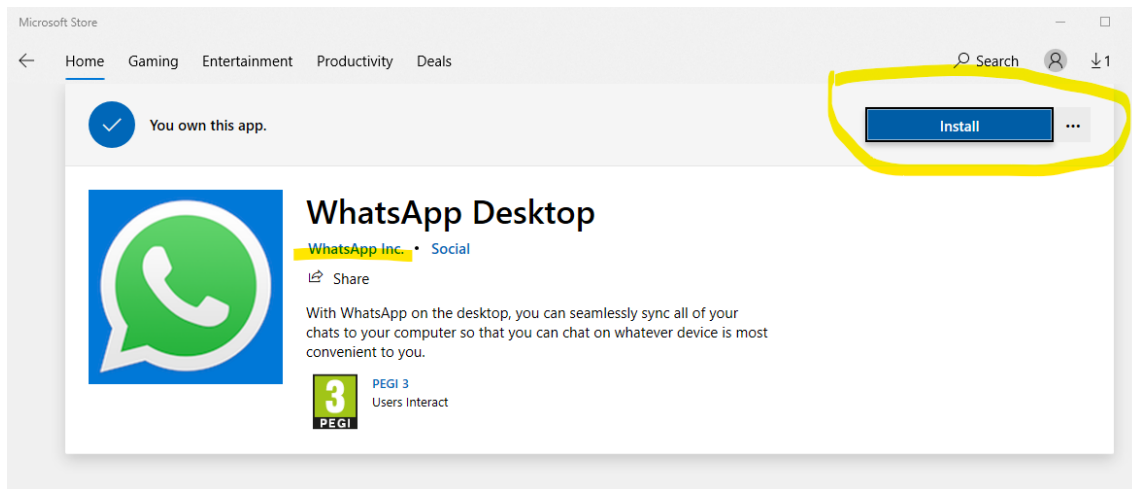

Once the Microsoft Store application is running click the search icon in the top right

Type in **WhatsApp** in the search field

Click on the WhatsApp search result and then click the blue **install** button to install. Make sure the application author is **WhatsApp Inc.**

The Application will now install and after a few minutes click the blue **Launch** button. You will now need to scan the QR code on your mobile phone. Follow the instruction below to scan the QR code

To use WhatsApp on your computer:

1. Open WhatsApp on your phone
2. Tap **Menu**  or **Settings**  and select **Linked Devices**
3. Point your phone to this screen to capture the code

[Need help to get started?](#)

Once you have linked your device you will see your messages and contacts from your phone.

The WhatsApp icon will be on the start menu under Recently Added, you can left click on it and **Pin to Start**

As with any application if you want the icon on your desktop, left click on the icon and drag and drop it onto the desktop.
