

Interesting & useful things your Mac can do...

That you may not have known 🤔

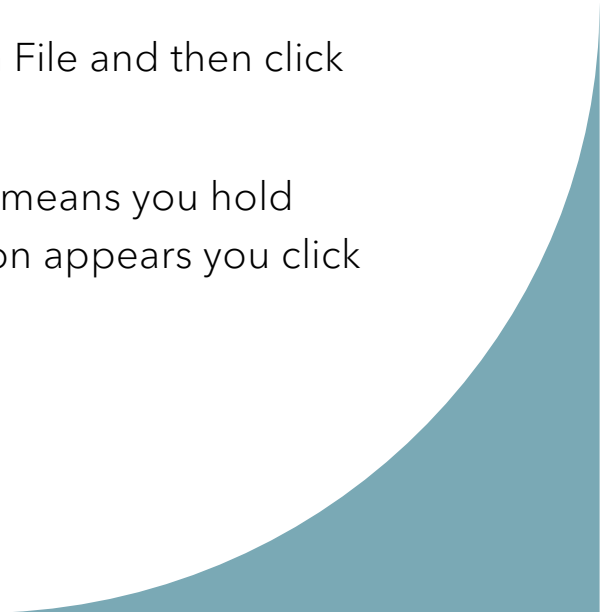

Agenda

- Useful things you may not know that MacOS can do
- How to watch YouTube videos with ZERO adverts!
- **Bonus:** Some interesting things you may not know that Safari can do

How to understand the notation used on the following slides

- When you see something like "Shift+Cmd+= " that means that you press the Shift and Cmd and = keys all at the same time (i.e. press Shift, keep it down and press Cmd, keep it down and press =)
- When you see something like "File/Add to dock" that means you click on File and then click on "Add to dock"
- You may see something like "Shift+Cmd+5/Options/Other location..." it means you hold down the three keys. Shift and Cmd and 5, and when the "Options" button appears you click that and then click "Other location..."

Useful things that MacOS can do

- Spotlight is a Calculator, Converter, and Launcher
Cmd+space
- Finder & space bar preview
- Zoom anything on your screen anywhere (any app!)
Settings/Accessibility/Zoom
- Three finger drag & drop (trackpad only)
Settings/Accessibility/Pointer control/Trackpad
- Stop saving screenshots on your desktop
Shift+Cmd+5/Options/Other location...
- Use your iPhone as a magnifying glass for your Mac (needs Tahoe or newer macOS)
Cmd+Space then type Mag to find the magnifier app
Magnifier App/Camera/iPhone
- Protect important files with "Stationery Pad"
right click on file/Get Info/Stationery pad

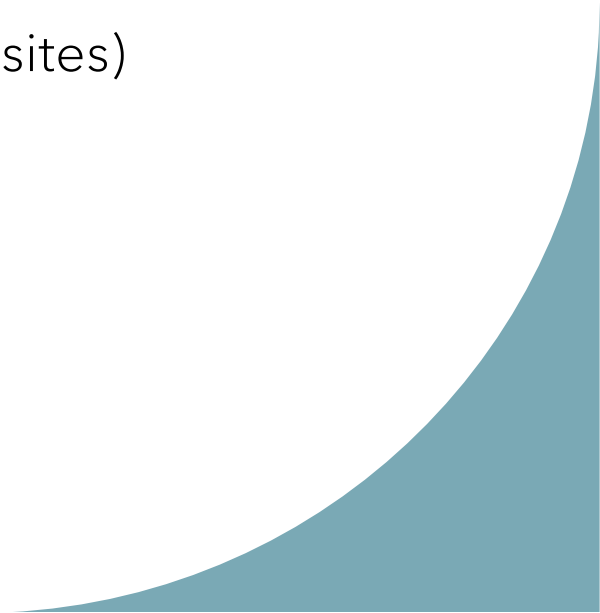

Watch YouTube with ZERO adverts!

- Simply use the DuckDuckGo browser (from App store)
It has built in ad removal for YouTube
Google may not like this so use it while you can 😎

Some interesting things that Safari can do

- Reader mode
Shift+Cmd+R
- Permanent reader mode for given websites (or all websites)
File/Settings/Websites
- Turn website into an App (e.g. Gmail)
File/Add to dock

Topics for future meetings
